

2000 Kentucky Commuting Patterns

The newly released 2000 commuting patterns data for the Commonwealth indicates that Kentucky is a net importer of labor. In 2000, 1,786,841 persons worked at a location in Kentucky with a net gain of 5,108 persons coming into the state to work versus leaving it to work elsewhere. In 1990, Kentucky was a net exporter of labor with 5,503 more persons leaving than coming into it to work. In 2000, Kentucky had a net gain of 32,705 workers from Illinois, Indiana, Tennessee and Virginia, while experiencing a net loss of 27,454 to Missouri, Ohio, and West Virginia. The State's greatest net change was a net loss of 26,730 to Ohio.

Kentuckians are also increasingly commuting outside of their home county to work. In 1960 14.0% of Kentuckians commuted out of county to work; in 1970, 18.0%; in 1980, 21.7%; in 1990, 25.9%; and in 2000, 30.3%. The map showing the 2000 percent of workers commuting to work outside of resident county indicates a range of 7.7% in Jefferson County to 77.9% in Spencer County. Eighty-five of Kentucky's 120 counties are above the

state's average of 30.3% with the largest percentages in the suburban counties.

The 2000 commuting pattern data showing workers who both live and work in their resident county, those who commute out and those who commute in is available by county at the KSDC/KPR website (ksdc.louisville.edu). The Robertson County table on page 4 is an example of 2000 commuting pattern data indicating 358 workers who both live and work in Robertson County, 564 resident workers who work outside in 17 other Kentucky counties and 3 other states and the District of Columbia, and 73 nonresident workers who commute into Robertson County from 6 other Kentucky counties.

Percent of Workers Commuting to Work Outside Resident County 2000

% of Kentucky Residents Working Outside Resident County: 30.3%

Map prepared by the Kentucky Cabinet for Workforce Development, Office of Workforce Research and Analysis.

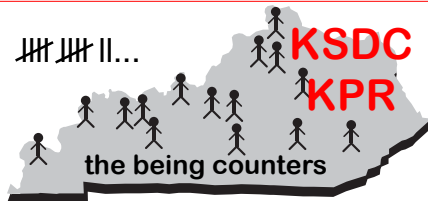

2000 County to County Worker Flows

KSDC News

Percent of Kentucky Residents Working Outside of Resident County

KSDC Newsletter Changing to Electronic Format

Two years ago our readership was given the option to start receiving the KSDC Newsletter by e-mail. The offer was made to reduce the expenses associated with producing and disseminating a paper copy. Approximately 220 of the over 4,000 individuals on our mailing list made the change. Since that time, postage and printing costs have increased and we are about to experience our second budget cut. The program now has no option but to make the change to the electronic format.

To continue receiving this newsletter and announcements about new products, conferences, and workshops, send us your name, title, organization, address, telephone number, and, of course, e-mail address. Why do we want all of this information? To reduce the number of e-mails that you will receive from us. Having this information will allow us to target many of our announcements by geography or interest. For example, individuals in Hickman will not be receiving e-mails about workshops in Hazard. Our **promise** is to keep the number of e-mails to a minimum.
